## NURSECALL MESSAGING

NexusCare provides a powerful messaging platform that delivers nursecall alerts directly to smartphones. Developed by GHM Care, Nexus takes alerts from your existing nursecall systems and delivers the information to smart devices so you can silence intrusive alarms around the home.

Upcycle your current nursecall system

- **(C)** Works with all existing nursecall systems
- Silence your nursecall, offering tranquility for residents and staff
- Improve response times to critical alarms

For the first time, all is now calm. We don't sound or feel like an institution anymore. As you walk around the home it feels peaceful and like I've always intended a home should be.

#### 66

66

Until they were silenced by Nexus I had not appreciated just how intrusive Nursecall bells were. Now I notice the calmness on a daily basis.

### NURSECALL REPORTING

NexusCare provides a reporting dashboard, to give a much deeper understanding of your nursecall activity across multiple locations. You can also integrate & automatically record activity on personal care records.

<u>≟</u>Û

Average response times

Busiest periods in each home

 $\bigcirc$ 

Resident activity & behaviour trends

Level of call e.g. emergency, assistance

66

Using NexusCare, we are able to unlock valuable management information that has previously been inaccessible to us. It also provides excellent evidence to support our CQC rating.
