HOW NEXUSCARE SUPPORTS YOUR CQC ASSESSMENT

We understand what good and outstanding care looks like in the eyes of CQC. See how NexusCare provides the evidence CQC requires - all at the touch of a button.

ghmcare

CQC Evidence Required

NexusCare Supportive Evidence

EFFECTIVE
Monitoring and improving outcomes

- Full visibility of nursecall activity including types of calls, response times etc.
- Speeds up response times as carers no longer need to return to a console
- Monitors individual carers to support training & development
- Identify/improve missed SLA response times

EFFECTIVE
Delivering evidence-based care and treatment

- Provide the correct level of care informed by data on busiest periods, zones and residents
- Integrate nursecall data with digital care records to get a 360 view of resident care

CARING
Responding to people's immediate needs

- Speeds up response times
- Reduce noise from alarms to create a calmer environment for residents.
- Understand which residents use their nursecall most and when so you can plan ahead and respond quicker/smarter

RESPONSIVE
Providing information

- Provides management with full visibility of nursecall activity to assist with resources, processes and planning
- Share useful nursecall data and response times with residents and those close to them

WELL-LED
- Governance and assurance
- Learning, improvement and innovation

- Upgrade your existing nursecall system, regardless of age, without the cost or disruption of a new system
- Latest integration/innovation with digital care records
- Nursecall alerts sent directly to carers mobile devices
- Reduce noisy alarms around the home
- Full reporting of nursecall activity at the touch of a button - response times, types of call, busiest persiods/zones, missed SLAs etc.
